JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS
Volume 74, Number 1–2, 5 November 1996

CONTENTS

J.T. Oden and G.F. Carey
Preface 1

A.N. Agarwal and P.M. Pinsky
Stabilized element residual method (SERM): A posteriori error estimation for the advection–diffusion equation 3

T. Arbogast, S. Bryant, C. Dawson, F. Saaf, C. Wang and M. Wheeler
Computational methods for multiphase flow and reactive transport problems arising in subsurface contaminant remediation 19

O. Axelsson
The stabilized *V*-cycle method 33

I. Babuška, B. Andersson, B. Guo, J.M. Melenk and H.S. Oh
Finite element method for solving problems with singular solutions 51

Z. Bai, M. Fahey and G. Golub
Some large-scale matrix computation problems 71

R. Barrett, M. Berry, J. Dongarra, V. Eijkhout and C. Romine
Algorithmic bombardment for the iterative solution of linear systems: A poly-iterative approach 91

T. Belytschko, Y. Krongauz, M. Fleming, D. Organ and W.K. Liu
Smoothing and accelerated computations in the element free Galerkin method 111

J.L. Bona, V.A. Dougalis, O.A. Karakashian and W.R. McKinney
The effect of dissipation on solutions of the generalized Korteweg–de Vries equation 127

J.H. Bramble and J.E. Pasciak
Least-squares methods for Stokes equations based on a discrete minus one inner product 155

B. Engquist and O. Runborg
Multi-phase computations in geometrical optics 175

R.E. Ewing
Multidisciplinary interactions in energy and environmental modeling 193

T.J.R. Hughes and J.R. Stewart
A space–time formulation for multiscale phenomena 217

T. Kärkkäinen, P. Neittaanmäki and A. Niemistö
Numerical methods for nonlinear inverse problems 231

J.T. Oden and Y. Feng
Local and pollution error estimation for finite element approximations of elliptic boundary value problems 245

A.L. Pardhanani and G.F. Carey
Efficient simulation of complex patterns in reaction–diffusion systems 295

S. Shaw, M.K. Warby and J.R. Whiteman
Discrete schemes for treating hereditary problems of viscoelasticity and applications 313

D.M. Young and D.R. Kincaid
A new class of parallel alternating-type iterative methods 331

Author Index 345
